## EDITORIAL

It is with great delight, we are presenting this volume of Indian Journal of Applied Homoeopathy to the profession after a span of considerable period.

This issue of IJAH is based on First Module of Homoeopathic Medical Education Technology, devised by Central Council of Homoeopathy, to promote Teaching –Learning capabilities of the teaching faculty all over India, so as to produce competent Homoeopathic Physician and is being published to mark the 40th Anniversary of Central Council of Homoeopathy.

The resource persons of the Homoeopathic Medical Education Technology Workshop of the Central Council have contributed their articles for this volume.

You are aware that the journal was published by me, during my tenure as Principal of Shree Kamaxidevi Homoeopathic Medical College, Shiroda-Goa. Now, I am shifted to JIMS Homoeopathic Medical College & Hospital, therefore a place of publication of the journal has shifted to Hyderabad.

We are inspired and blessed by HH Sri Sri Sri Tridandi Srimannarayana Ramanuja Chinna Jeeyar Swamiji, an acclaimed Vedic pontiff, spreading the message of 'Universal Brotherhood and Wellbeing, who is a mentor of JIMS Homoeopathic Medical College & Hospital, Dr. J. Rameshwar Rao, Chairman, Governing Council of the college and Dr. Pavuluri Krishna Choudhary, a distinguished homoeopathic physician and trustee of the Institute.

We are grateful to Shri. Subhash Shirodkar, Chairman, Governing Board, Shree Kamaxidevi Homoeopathic Medical College, Shiroda-Goa for his co-operation and permission to publish the same Journal in association with any other organization.

Government of India, Ministry of AYUSH aspires to provide cost effective AYUSH services and upgrade Under-graduate and Post-graduate educational institutions in India. Central Council of Homoeopathy has designed Skill based Training Modules for the faculty members from homoeopathic medical colleges all over India to develop focused approach to clinical training by adopting appropriate technology and skills.

The Central Council, Universities and the homoeopathic colleges under their privileges should take up the challenge to impart quality education & clinical training and produce competent homoeopathic physician to serve the society, so as to promote homoeopathy as the first line of treatment in India.

We wish each one of our professional colleague a very happy and prosperous New Year-2016.

- Arvind Kothe
